

Plastic Polymers

Sara L. Reynoso

Table of Contents

1. The Knowledge of Polymers

- 1.1 Why it's important to learn about polymers?
- 1.2. What is a Polymer?
- 1.3. What is a Plastic?

2. Molecular Structure

- 2.1. Carbon
- 2.2. The Monomer
- 2.3. Intramolecular Features
- 2.4. The Isomer
- 2.5. Types of Isomerism
- 2.6. Structural Isomerism
- 2.7. Stereoisomerism
- 2.8. Chain Branching
- 2.9. Branching Types
- 2.10. Tacticity
- 2.11. Repeated Unit Location
- 2.12. Copolymers
- 2.13. Block Copolymers
- 2.14. Chain Forms
- 2.15. Homologous Series
- 2.16. Polymer Families
- 2.17. Structure and Thermal Properties
- 2.18. Molecular Weight Averages and Distributions
- 2.19. Inorganic Polymers
- 2.20. Thermoset Polymers
- 2.21. Crosslinking Process
- 2.22. Gelation

3. Manufacture and Use of Monomers

- 3.1. Primary Sources of Synthetic Polymers
- 3.2. Petrochemicals Processing
- 3.3. Thermal Cracking
- 3.4. Intermediates and Petrochemical Monomers
 - 3.4.1. Ethylene
 - 3.4.2. Propylene
 - 3.4.3. Butadiene
 - 3.4.4. Benzene
 - 3.4.5. Xylene
 - 3.4.6. Aromatic Complexes

4. Polymerization

4.1. The Polymerization Process

4.2. Polymerization Mechanisms

4.3. Chain Growth Polymerization

4.3.1. Chain Initiation

4.3.2. Propagation

4.3.3. Transfer and Termination

4.3.4. Controlling the Polymerization

4.4. Step Growth

4.5. Stoichiometry

4.6. Stoichiometry Classification

4.6.1. Condensation Polymerization

4.6.2. Addition Polymerization

4.7. Classification according to Reaction Medium

4.7.1. Mass Polymerization

4.7.2. Emulsion Polymerization

4.7.3. Suspension Polymerization

4.8. Classification by Nature of Propagating Species

4.8.1. Anionic Polymerization

4.9. Other Types of Classification

4.10. Copolymerization

5. Thermomechanical Properties of Polymers

5.1. Viscoelasticity

5.2. Viscoelastic Behavior

5.3. Stress vs. Strain Graph

5.4. Time – Temperature Relation

5.5. Dynamic Mechanical Properties

5.6. Molecular Orientation

5.7. Crystallization

5.8. Crystalline Structure

5.9. Degree of Crystallinity

5.10. Amorphous State

5.11. Glass Transition

5.11.1 The 5 Viscoelastic Behaviors in the Glass Transition Curves

6. Physical Properties of Polymers

6.1. The Importance of Physical Properties

6.2. Mechanical Properties

6.2.1. Flexural Properties

6.2.2. Flexural Strength

6.2.3. Flexural Modulus

6.2.4. Stress and Elongation

6.2.5. Elongation

6.2.6. Tensile Strength

6.2.7. Impact Resistance

6.2.8. Impact Resistance with Pendulum

6.2.9. Dart Drop Impact Resistance

6.3. Hardness

- 6.3.1. Shore Hardness
- 6.3.2. Ball Indentation Hardness
- 6.3.3. Rockwell Hardness

6.4. Thermal Properties

- 6.4.1. Melting Point
- 6.4.2. Glass Transition Temperature
- 6.4.3. Differential Scanning Calorimetry (DSC)
- 6.4.4. Thermogravimetric Analysis (TGA)
- 6.4.5. Vicat Softening Point
- 6.4.6. Deflection Temperature Under Load (HDT, DTUL)

6.5. Electrical Properties

- 6.5.1. Dielectric Strength
- 6.5.2. Volumetric and Surface Resistivity
- 6.5.3. Dielectric Constant
- 6.5.4. Dissipation Factor
- 6.5.5. Arc Resistance

6.6. Optical Properties

- 6.6.1. Gloss
- 6.6.2. Haze
- 6.6.3. Transmittance
- 6.6.4. Color
- 6.6.5. Yellowing Index

6.7. Other Properties

- 6.7.1. Specific Gravity / Density
- 6.7.2. Rheology and Dynamics
- 6.7.3. Flow Index
- 6.7.4. Viscosity Number
- 6.7.5. Moisture Absorption

7. Polymer Families

7.1. Ethylene based Polymers

- 7.1.1. High Density Polyethylene (HDPE)
- 7.1.2. Low Density Polyethylene (LDPE)
- 7.1.3. Very Low-Density Polyethylene (VLDPE)
- 7.1.4. Linear Low-Density Polyethylene (LLDPE)
- 7.1.5. Ultra High Molecular Weight Polyethylene (UHMWPE)

7.2. Propylene based Polymers

- 7.2.1. Polypropylene

7.3. Polyamides

- 7.3.1. Polyamide 6,6
- 7.3.2. Polyamide 6
- 7.3.3. Polyamide 6,12
- 7.3.4. Aromatic Polyamides (Aramids)

7.4. Polyesters

- 7.4.1. Types of Polyester
- 7.4.2. Polyethylene-Terephthalate (PET)
- 7.4.3. Polybutylene-Terephthalate (PBT)
- 7.4.4. Degradable Polyesters

7.5. Polycarbonates

7.6. Vinyl Chloride Polymers

- 7.6.1. Polyvinyl Chloride (PVC)
- 7.6.2. Chlorinated Polyvinyl Chloride (CPVC)

7.6.3. Polyvinylidene Chloride (PVDC)

7.7. Styrene Resins

7.7.1. Polystyrene (PS)

7.7.2. Expanded Polystyrene (EPS)

7.7.3. Styrene Acrylonitrile (SAN)

7.7.4. Acrylonitrile Butadiene Styrene (ABS)

7.8. Polymethyl Methacrylate (PMMA)

7.9. Elastomers

7.9.1. Styrene Butadiene Rubber (SBR)

7.9.2. Ethylene-Propylene Copolymers

7.10. Bioplastic Materials

8. Transformation Processes

8.1. Molding Processes

8.1.1. Injection Molding

8.1.2. Co-Injection and Bi-Injection

8.1.3. Over-Molding

8.1.4. Compression Molding

8.1.5. Rotational Molding (Rotomolding)

8.2. Extrusion Processes

8.2.1. Sheet, Film and Profile Extrusion

8.2.2. Co-Extrusion

8.2.3. Compounding

8.2.4. Blown Film Extrusion

8.2.5. Calendering

8.2.6. Spinning Extrusion

8.3. Blow Molding Processes

8.3.1. Extrusion Blow Molding (Mono and Multi-Layer)

8.3.2. Injection Blow Molding

8.3.3. Injection Stretch Blow Molding

8.3.4. Blow, Fill and Seal

8.4. Thermoforming

8.5. Immersion Molding

9. Fillers and Additives

9.1. Fillers

9.2. Additives

10. Recycling

10.1. Classification and Separation

10.2. Separation Methods

10.3. Processing

10.4. Recycling of PET

10.5. Final Comment
