

Plastics Recycling

Sara L. Reynoso

Table of Contents

Prologue

1. Challenges and Opportunities

- 1.1 Introduction
- 1.2. Plastic Waste Management in the World
- 1.3. The Plastics Recycling Industry

2. Plastics and Their Degradation

- 2.1. What is a Polymer?
- 2.2. What are Plastics?
- 2.3. Degradation
- 2.4. Oligomers, molecular weight and fluidity
- 2.5. Environmental Degradation

3. Separation and Classification

- 3.1. Sources of Plastic Waste
- 3.2. Classification
- 3.3. Plastic Recycling
- 3.4. Separation
- 3.5. Separation Methods
 - 3.5.1. Other Methods of Separation
- 3.6. Near-Infrared Spectroscopy

4. Recycling Methods

- 4.1. Recycling Methods
- 4.2. Primary Recycling
- 4.3. Secondary Recycling
- 4.4. Tertiary Recycling
 - 4.4.1. Hydrogenation
 - 4.4.2. Thermal gasification
 - 4.4.3. Hydrolysis
 - 4.4.4. Glycolysis and Methanolysis
 - 4.4.5. Pyrolysis
- 4.5. Use of Plastic Waste Products
- 4.6. Use of Plastics as Fuel
- 4.7. Quaternary recycling
- 4.8. Zero-Order Recycling

5. Additives Used in Recycling

- 5.1. Challenges in Recycling
- 5.2. Feeding and Mixing equipment
- 5.3. Additives

- 5.3.1. Chain Extenders
- 5.3.2. Stabilizing Agents
- 5.3.3. Compatibilizing Agents
- 5.3.4. Impact Modifiers
- 5.3.5. Nucleating – Clarifying agents
- 5.3.6. Antioxidants
- 5.3.7. Color Agents
- 5.3.8. Other additives

5.4. Fillers

5.5. The Right Amount

6. PET Recycling

- 6.1. Safe, Recyclable, and Sustainable
- 6.2. Condensation Polymer
- 6.3. The Chemistry of PET
- 6.4. The PET Bottle and Its Collection
- 6.5. The Other Components
- 6.6. Methods Used in PET Recycling
 - 6.6.1. Mechanical Recycling of PET

7. Polyolefin Recycling

- 7.1. Polyolefins
- 7.2. Polyethylene
- 7.3. High Density Polyethylene (HDPE)
 - 7.3.1. Sources of Material for Recycling
- 7.4. Low Density Polyethylene (LDPE)
- 7.5. Recycling of HDPE and LDPE
 - 7.5.1. Chemical Recycling of Polyethylene (LDPE and HDPE)
 - 7.5.2. Post-Consumer HDPE Recycling for Food-Grade Applications
- 7.6. Polypropylene
- 7.7. Recycling of Polypropylene
 - 7.7.1. Separation of Polypropylene, HDPE and PET
 - 7.7.2. Chemical Recycling of Polypropylene
 - 7.7.3. Post-Consumer PP Recycling for Food-Grade Applications

8. PVC Recycling

- 8.1. Polyvinyl Chloride (PVC)
- 8.2. Other Materials in PVC
- 8.3. Recycling of PVC
- 8.4. Chemical Recycling of PVC
 - 8.4.1. Dehydrochlorination

9. Polystyrene Recycling

- 9.1. Polystyrene (PS)
- 9.2. Expandable Polystyrene (EPS)
- 9.3. Recycling of Polystyrene
 - 9.3.1. Chemical Recycling of Polystyrene
 - 9.3.2. Quaternary Recycling of Expanded Polystyrene Foam
- 9.4. Reuse of Recycled Expanded Polystyrene

10. Rubber and Thermoset Polymers

10.1. Thermoset Polymers

10.2. From Thermoplastic to Thermoset

10.3. Synthetic Rubber

10.3.1. Styrene-Butadiene Rubber (SBR)

10.4. Vulcanization

10.5. Recycling of Rubber

10.6. Devulcanization

10.6.1. Devulcanization Methods

10.7. Applications with Ground Rubber

11. Code 7

11.1. Other Thermoplastics

11.2. Polymer Blends and Compounds

11.3. What Is Being Done?

12. Biodegradability, Bioplastics, and Biodegradable Polymers

12.1. Biodegradability

12.2. Defining Bioplastics

12.2.1. Biodegradable Polymer

12.2.2. Biopolymer

12.2.3. Bio-Based Polymer

12.2.4. Oxo-Degradable Polymer

12.3. Compostability

12.4. Raw Materials from Renewable Sources

12.5. Bio-Content

12.6. Are they the solution?

13. Designed for Recycling

13.1. Design in One Single Material

13.1.1. A Very Real Case

13.2 Design for Easy Separation

13.3. Decrease the Quantity

13.4. More Durable Products

13.5. Use of Color in the Packaging Industry

14. Life Cycle Analysis, Circular Economy, and Sustainability

14.1. Life Cycle of an HDPE Bottle

14.2. Circular Economy

14.3. Sustainable Manufacturing

14.3.1. Sustainable Manufacturing Processes

14.3.2. Development of Green Processes

15. A Tiny Problem with Big Implications

15.1. Microplastics

15.2. Primary Microplastics

15.3. Secondary Microplastics

15.4. Other Sources of Microplastics

15.5. Microplastics in the Marine Environment

Final Comment
